SUMMARY

Adaptable Software Engineer with expertise spanning full-stack development, scalable system architecture, and AI-driven solutions. Experienced in leading technical teams and translating complex requirements into robust applications. Passionate about solving complex problems through modern tech stacks and collaborative engineering.

EXPERIENCE

Flutter Developer - Intern

Dec 2025 - Jun 2026

ARTecX Solutions

- Built responsive UIs for mobile apps and web dashboards using Flutter.
- Integrated RESTful APIs and architected server-side backends using Node.js.
- Promoted to Mobile Team Lead, managing developers and delivering full-stack projects.

Asst. Webmaster

Jul 2024 - Jul 2025

IEEE Student Branch of SLTC

- Managed social media platforms.
- Contributed to developing the official website of the SLTC IEEE.

EDUCATION

BSc. (Hons) in Software Engineering

Mar 2022 - Mar 2026

Sri Lanka Technology Campus

- GPA: 3.00
- Thesis on "Enhancing AI-Driven NPC Interactions Through Advanced Prompt Engineering"

Diploma in Spoken English

Mar 2022 - Jun 2022

ICBT Kandy Campus

G. C. E. Advanced Level

2018 - 2021

St. Thomas' College, Matale

- ET - C, SFT - C, ICT - B

G. C. E. Ordinary Level

2012 - 2017

St. Thomas' College, Matale

- 8 A grades, 1 B grade

TECHNICAL & PROFESSIONAL SKILLS

HTML/CSS

Python

ReactJS

Figma

JavaScript

Java

Dart

GitHub

PHP

C

Flutter

AWS

SOFT SKILLS

Graphic Designing
Video Editing

Prompt Engineering
Web Content Creation

Attention to Detail
Leadership

PROJECTS

Enhancing AI-Driven NPC Interactions Through Advanced Prompt Engineering

- Developed AI-driven Non-Player Characters (NPCs) to replace traditional scripted interactions, aiming to create a more dynamic and immersive gaming experience.
- Demonstrated the concept through a 2D chat-based role-playing game, utilizing advanced prompt engineering techniques to generate realistic and adaptive NPC behaviors.
- Technologies used: TypeScript, React, Vite, Node.js, CSS, Gemini API.

AI-Powered Career Guidance System

- System to helps users identify suitable tech roles based on their personality traits and skills.
- Technologies used: Next.js, TypeScript, Tailwind CSS, shadcn/ui, Axios, Python, Flask/FastAPI, Pandas, scikit-learn.

Smart Fan Control Using Image Processing

- A touchless fan control system designed to interpret hand gestures for adjusting fan speed and power, offering a seamless, contact-free experience.
 - Technologies used: OpenCV, MediaPipe, Python, Arduino.
-

VOLUNTEERING

IEEE Student Branch SLTC:

- **Sri Lanka Arduino Challenge 2025** - Content Creation Team Head
- **IEEE GISLA 2024** - Design Team Deputy Head / Content Creator
- **Codemanía v4.0** - Content Creation Team Deputy Head
- **IdeaniX Generation 01** - Design Team Member / Content Creation Team Member

SLTC ISACA Student Group:

- **ZERO DAY** - Content & Caption Team Head
-

CERTIFICATIONS

Fundamentals of Quality Assurance - Alison

C for Beginners - Great Learning

Web Design for Beginners - University of Moratuwa

Learn Basics of Adobe Photoshop CC 2022 for Beginners - Udemy

IP Addressing and Subnetting - Zero to Hero - Udemy

Python Programming - SITEC Education Matara

Web Development - SITEC Education Matara
